SKILLS AND TOOLS

- **Languages:** PHP, Python (Django), Golang — GoFiber, GORM, Web Scraping & Automation
- **Databases:** PostgreSQL, MySQL, SQLite
- **Version Control:** Git & GitHub
- **DevOps & Deployment:** GitHub Actions, Linux, Docker, AWS

CERTIFICATIONS

Fundamentals of Backend Engineering — Hussein Nasser, Udemy — Nov 2024 ([Verify](#))

Fundamentals of Database Engineering — Hussein Nasser, Udemy — Dec 2024 ([Verify](#))

PROFESSIONAL EXPERIENCE

QuickAir · MyRoomStatus (Proprietary SaaS Products) — Hybrid (Primarily On-site) Feb 2026 – Present
Backend Developer

- Designed and built QuickAir, a B2B flight aggregation platform serving Nigerian travel agencies — concurrent fan-out search across 12 airline portals using a 3-tier scraper architecture (aggregator API, headless Chrome via go-rod, lightweight HTTP scrapers).
- Implemented real-time flight result streaming via Server-Sent Events (SSE) and a durable ticket-issuance queue with atomic job claiming, dependent-segment ordering, and automated PNR generation.
- Built MyRoomStatus, a full-stack hotel property management system deployed as both cloud SaaS (PostgreSQL) and a standalone offline binary (SQLite + embedded React SPA via go:embed) from a single codebase.
- Integrated smart lock support into the platform, along with real-time WebSocket hubs for dashboard and Smart TV updates.
- Integrated a Google Gemini AI chatbot with a hotel-specific knowledge base and the Paystack payment gateway with dedicated virtual accounts.

Freelance Web Developer — Awka, NG 2023 – Present
Web Developer

- Designed and developed custom websites and solutions using PHP, Laravel, Django, and AJAX for small businesses, startups, clients, and final-year students.

PROJECTS

QuickAir — quickair.app

B2B flight booking platform for Nigerian travel agencies. Golang, GoFiber, go-rod, PostgreSQL, SSE, Paystack.

MyRoomStatus — myroomstatus.com

Hotel property management system. Cloud SaaS + offline binary. Golang, GoFiber, React, WebSockets, Gemini AI, Paystack.

Conexia — pypi.org/project/conexia

Python library for resolving network information via STUN servers. Published on PyPI.

EDUCATION

Nnamdi Azikiwe University — Awka, Nigeria
Industrial & Production Engineering

2019 – 2025
